

Supply Line

- Toilet
- Faucet
- Dishwasher
- Ice Maker
- Washing Machine

Aida offers this proven Stainless Steel Braided Water Supply Line for use even in exposed locations. The flexible line resists corrosion and is easy to install. The hose is designed to prevent kinking and crimping and the chrome plated brass nuts are designed for strength and durability.

Our line is NSF 61 listed and features a 125 psi design working pressure with 2400 psi burst pressure at 158°F.

Toilet Supply Line

- #320001 - 9in, 3/8" Compression x 7/8" Ballcock
- #320002 - 12in, 3/8" Compression x 7/8" Ballcock
- #320003 - 16in, 3/8" Compression x 7/8" Ballcock

- #320004 - 12in, 1/2" Compression x 7/8" Ballcock
- #320005 - 16in, 1/2" Compression x 7/8" Ballcock

The flexible line resists corrosion and is easy to install. The hose is designed to prevent kinking and crimping and the chrome plated brass nuts are designed for strength and durability. It's inner core is reinforced to resist chlorine and chloramines leaching and deterioration to ensures long-lasting performance.

Faucet Supply Line

- #320006 - 12in, 3/8" Compression x 1/2" FIP
- #320007 - 16in, 3/8" Compression x 1/2" FIP
- #320008 - 20in, 3/8" Compression x 1/2" FIP

- #320009 - 12in, 1/2" Compression x 1/2" FIP
- #320010 - 16in, 1/2" Compression x 1/2" FIP

The flexible line resists corrosion and is easy to install. The hose is designed to prevent kinking and crimping and the chrome plated brass nuts are designed for strength and durability. It's inner core is reinforced to resist chlorine and chloramines leaching and deterioration to ensures long-lasting performance.

Dishwasher Supply Line

- #320011 - 60in, 3/8" Compression x 3/8" Compression*
- #320012 - 72in, 3/8" Compression x 3/8" Compression*

* Includes: 90-Degree Brass Fitting

This connector is ideal to connect NEW dishwashers with a garden hose connection to the water supply. Corrosion resistant inside and out, this connector features a high tenacity, multi-filament yarn, protected by a special polymer coating for optimum corrosion resistance and durability. On the inside, our tough PVC tubing resists attack by chlorine, chloramines and other corrosive elements.

Ice Maker Supply Line

- #320013 - 60in, 1/4" Compression x 1/4" Compression

When you choose this Stainless Steel supply line, you're choosing a strong, durable product that is constructed with a core of extruded PVC tubing. It is then over-braided with Stainless Steel to added strength. The design of this appliance connector incorporates brass inserts, plated nuts, and a washer that ensures a dependable hand-tight seal.

Washing Machine Supply Line

- #320014 - 60in, 3/4" Female Swivel Hose Couplings with Cone Washer Seals*
- #320015 - 72in, 3/4" Female Swivel Hose Couplings with Cone Washer Seals*

* Includes: 2000 lb. Burst Pressure at Ambient Temperature,
300 lb. Working Pressure at 125°F,
500 lb. Working Pressure at 72°F,
2 Pack

Stainless Steel hoses easily identify the hot and cold water lines connecting your water supply to your washing machine. Reinforced hose construction provides enhanced flexibility and ease of installation. Each hose has a rubber washer pre-installed in both female hose end fittings. It is recommended to change your washing machine hoses every 5 years.
