PRESS RELEASE

Aida Introduces Revolutionary GFCI + USB Combination Outlets for Modern Homes

Jacksonville, FL – July 22, 2024 – Aida, a leader in innovative electrical solutions, is proud to announce the launch of its new product line: the GFCI + USB Combination Outlets. These cutting-edge outlets seamlessly integrate ground fault circuit interrupter (GFCI) protection, USB charging ports, and optional sensor-controlled night lights into one compact device, offering a sophisticated and multi-functional solution for modern homes. Designed to maximize functionality and safety, these outlets are perfect for space-constrained areas such as kitchens and bathrooms.

The new GFCI + USB Combo Outlets by Aida boast an array of impressive features that set them apart from the competition. The innovative multi-function design combines GFCI protection with USB chargers and optional sensor-controlled night lights, while the standard/regular depth eliminates the need for additional J-box installation. The outlets have been rigorously tested to meet or exceed UL standards, undergoing over 6000 endurance tests, twice the requirement. Additional safety features include a patented self-test mechanism, reversed wiring prevention, and a reset-disable system to maintain safety integrity.

Aida's GFCI + USB Combination Outlets also feature superior electronics that provide excellent resistance to electrical surges, dual USB ports with Type A/C and Type C/C options, and smart charging capabilities. The universal compatibility allows these outlets to fit all junction boxes, decorator devices, and wall plates, with a compact profile for easier wiring. Additional options include a self-grounding accessory and tamper-resistant shutters to enhance safety. Made from durable thermoplastic materials, these outlets ensure long-lasting performance and reliability, making them the ideal choice for any modern home.
